## PSYCHOLOGY/IT STUDENT

A dedicated and detail-oriented student passionate about the intersection of Information Technology and Psychology, with a focus on applying technology to solve human-centered problems. I aim to contribute my skills in web design, programming, and an understanding of psychological principles to foster better user experiences, data-driven decision-making, and mental health solution

## KEY SKILLS

- Web Development
- Psychological Analysis
- Human-Computer Interaction
- Power-point
- User Experience Design (UX)
- Critical Thinking
- Data Analytics
- Canva
- Empathy and Communication
- Frontend Design
- Self-Motivation
- Excel

## EXPERIENCE/PROJECTS

### Portfolio Website

Developed a personal portfolio website using HTML, CSS, and JavaScript to showcase web development and psychological research skills. Focused on creating a user-friendly, responsive design with intuitive navigation.

### Micro Website

Developed a mock website using HTML, CSS, and JavaScript to showcase web development skills. Focused on creating a user-friendly, responsive design with intuitive navigation. With a team showcasing strong communication and teamwork skills.

### Personal Research

Conducted an in-depth literature review on how digital platforms are transforming mental health care, focusing on teletherapy, mental health apps, and AI-driven interventions.
